

# Identifying behavioural styles

Personality & behaviour

People assessment can help you improve your managers' people skills so they can manage and motivate their team more effectively.

The Thomas International's PPA tool will empower your managers to understand their people better and develop their management style to deliver engagement and maximise performance.

The Personal Profile Analysis (PPA) enables you, your people and your teams to understand their strengths, limitations and motivators.

**Online.** The assessment takes only 8 minutes to complete.

**Instant reports,** including Strengths & Limitations and Work Mask Behaviours, that enable you to motivate, engage and manage your people more effectively.

**Workshop** guided by NBO Trainers to assist in interpreting PPA reports. Which means you will optimise performance and reduce your staff turnover.

**Leadership or Team Development** programs can be customized in combination with PPA projects
